

# A Penguin Grows Up

Look at the stages of a penguin's growth. Then **circle** the correct answer.

Stage 1	Stage 2	Stage 3	Stage 4	Stage 5
				
<p>Dad holds the egg on his feet. A fold of skin helps the egg warm.</p>	<p>The chick hatches. Dad and mom take turns holding it on their feet.</p>	<p>The chick snuggles with other chicks to keep warm.</p>	<p>The chick loses its baby feathers.</p>	<p>The chick has grown up. It is an adult penguin now.</p>

1. When does the chick snuggle with other chicks?

**Stage 3      Stage 2**

2. When does the chick lose its feathers?

**Stage 3      Stage 4**

3. What happens in the first stage?

**Dad holds the egg on his feet.      The chick hatches.**

4. What happens in the last stage?

**The chick hatches.      The chick has grown up.**
